SUMMARY OF W9NY TEN METER RESULTS DURING JULY,1934.

Stations worked July 2-31 inc.
W1AV, W1BZC, W2AOL, W2DTB, W4AJY, W5WG, W6IDF, W8MAH, W9DHN,W9GBJ.

Stations heard July 2-31 inc.
W1BEI, W1CO, W1DQN, W2CVF, W2FAB, W2GOX, W2TP, W3BFH, W3BWD, W4ADT, W4ARL, W4BZH, W4CVG, W4MR, W5APG, W5CCB, W6VQ, W9AVS, W9DWV, W9FRQ, W9HZR, W9NVG, W9ROL, W9RSO.

Congrats on "Temegang" bulletin. It helps to keep those who have been on the band active. But was sorry not to find some ten meter dope in last QST, as that is the best way to get new stations on the band. Still find times when commercial harmonics are coming through, but no ham sigs.

Note that band was dead here at the time VK3MR reported hearing W6BAX.

Have heard KKZ for fourteen hours at a stretch, but no W6 or W7 sigs during that time. How much power are these commercials radiating on their second harmonics, how high are the antennas, and at what angle (vertical) is the second harmonic radiation propagated? If you could get this dope for us it might help some, as the commercial harmonics seem to get out much better than ham fundamental signals, (One reason, of course, because they are on all the time).

Attached is detailed report on times band was found open here during the month.

73,

H.F.Wareing, W9NY.
